ANSORP Pneumococcus Project

**Prospective, hospital-based, multinational surveillance
on antimicrobial resistance and serotypes of *S. pneumoniae*
and disease burden of pneumococcal infections in Asian
countries in the era of pneumococcal conjugate vaccine**

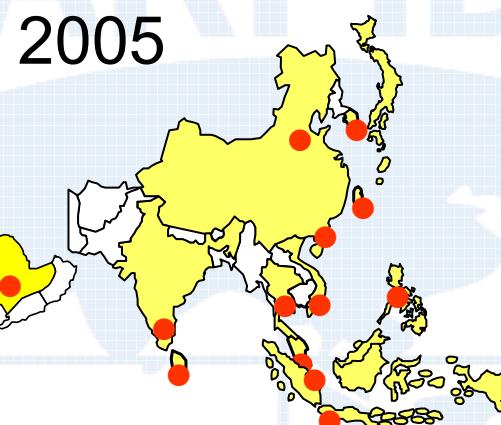

- Prospective, multicenter, hospital-based, active surveillance study on *S. pneumoniae* in Asian countries with focus on seroepidemiology and antimicrobial resistance
- Microbiologic evaluation and clinical analysis based on the review of the medical records

Objectives of the Investigator Meeting

- To check current status of the project
- To discuss current problems & solutions
- To make future plans

Schedule of the Investigator Meeting

2:30 PM – 5:30 PM

Moderator : Jae-Hoon Song (Organizer, ANSORP)

02:30 pm – 02:45 pm **Introduction** Jae-Hoon Song (Organizer, ANSORP)

02:45 pm – 03:00 pm **Overview of the Current Status of the Project**

Doo-Ryeon Chung (Samsung Medical Center, Korea)

03:00 pm – 05:00 pm **Presentation by all ANSORP Local Organizers**

Korea So Hyun Kim (ARFID)

Hong Kong Thomas So (Princess Margaret Hospital)

Taiwan Po-Ren Hsueh (National Taiwan University Hospital)

Thailand Visanu Thamlikitkul (Siriraj Hospital)

India M. K. Lalitha (Madras Medical Mission)

Malaysia Rohani Md Yasin (Institute for Medical Research)

Sri Lanka Jennifer Perera (University of Colombo)

Saudi Arabia Atef Shibli (King Saud University Hospital)

05:00 pm – 05:30 pm **Discussion** All Participants

05:30 pm **Closing Remarks** Jae-Hoon Song (Organizer, ANSORP)

**Prospective, hospital-based, multinational surveillance
on antimicrobial resistance and serotypes of
Streptococcus pneumoniae and disease burden of
pneumococcal infections in Asian countries in the era of
pneumococcal conjugate vaccine**

Overview of the Current Status

ANSORP

Investigator Meeting : November 28, 2008
Grand Hyatt, Taipei, Taiwan

Aims of the study

- **Primary objectives**

- To investigate the **seroepidemiology of pneumococcal diseases** in Asian countries in the beginning of pneumococcal conjugate vaccine (PCV) era
- To investigate the current status in **antimicrobial resistance of *S. pneumoniae*** in Asian countries in the beginning of PCV era

Study period

February, 2008 ~ March, 2009

Discussion points : Philippines

- IRB approval : approval obtained from all site
- Enrollment of cases :
 - Expected date, all centers activated: July 16, 2008
 - Expected enrollment rate: cases/month
 - Expected date, last subject enrolled: hard to predict
- Sample transport : first batch on Nov. 26, 2008

- Communication with participating centers : more difficult to coordinate with sites outside of Metro Manila
- Other issues : Some laboratories do not use selective media for *Streptococcus pneumoniae* such as gentamicin blood agar plate which lowers the likelihood of identifying the organism
